Explore the complete Gecko Experience Line

Gecko touchpad

Smarter control

Easy from the first touch

Everything you need, exactly where you expect it.

Intuitive

No manuals.
No confusion.

Clear

A large display
for effortless
reading and control.

Natural

The patented spamap™ interface makes spa control feel instantly familiar.

The experience you see and feel

Gecko app

Your spa, ready when you are.

Control temperature, lighting and massage, manage energy and take care of water from one place.

Gecko seatcontrol

Your settings, right where you sit.

Control pumps, lights, music and more without interrupting the moment.

Gecko beatbox

Your music, right where you relax.

Integrated audio controlled directly from the touchpad for an experience that feels built in, not added on.

Less navigating.
Less adjusting.
More enjoying.

The technology you don’t have to think about

Gecko smartbox

Everything working together.

Connectivity, automatic updates, real-time spa data and remote diagnostics keep the experience running smoothly behind the scenes.

Gecko powerbox

Power built for seamless operation.

Reliable control, up to 5 lighting zones, and a flexible platform built for connected accessories and future updates.

Gecko waterlab

Clear water. Without the guesswork.

Continuous monitoring and guided recommendations simplify water care while the hardware stays hidden under the spa.

Designed to feel effortless. Engineered to perform.

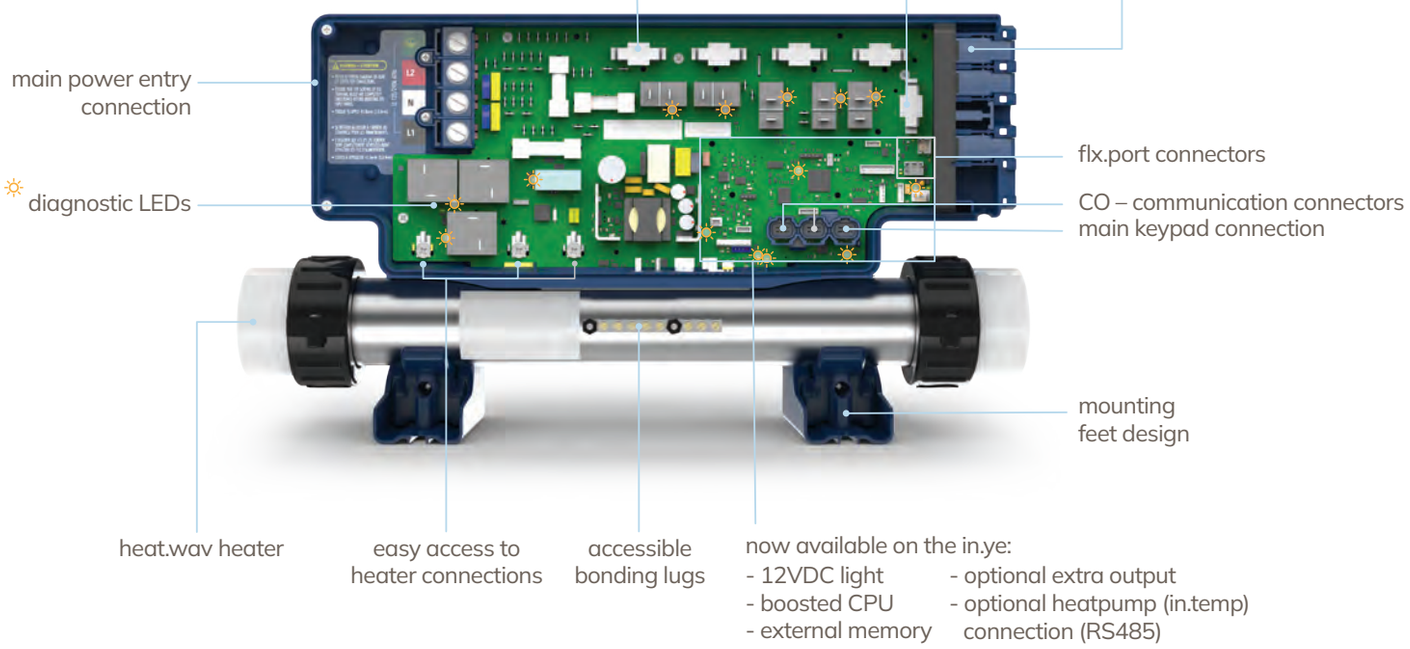

One connected experience

Designed around the way people enjoy their spa

That’s the Gecko Experience Line

Proven control
Flexible by design

A reliable foundation designed to fit a wide range of spa configurations.

Universal fit

Designed for easy installation and connection across different spa sizes and configurations.

Reliable performance

Dependable performance and complete spa control gives a proven platform to build around.

Ready for more

Add wireless control, water care, audio and more as your spa offering evolves.

Control at your fingertips

in.k1000 + and in.k1001+

Giving full control

Full-featured touchscreen control with intuitive navigation, a bright color display and Wi-Fi connectivity.

flx.go

Turn. Press. Done.

Simple, tactile control with Turn-N-Press technology.

in.k800

More control at a glance

10 keys, large color display and menu-driven navigation.

in.k500

Simple color control

7 keys and an easy-to-navigate color display.

in.k330

Compact and simple

5 keys with a color LCD interface.

in.k300

The essentials, made easy

4 keys and a streamlined LCD interface.

Powerful massage
Quiet by design

Gecko VMS-1

A smart variable-speed pump built to deliver a more flexible hydrotherapy experience with strong, whisper-quiet 3 hp performance.

Quiet comfort

- Powerful hydrotherapy without the distracting noise.
- Whisper-quiet performance keeps the focus on the water, the conversation and the moment.

Smarter efficiency

- More performance from every movement of water.
- Gecko's electric motor moves water efficiently, delivering up to 10% greater efficiency at high speed compared to the competition.

More massage possibilities

- Create more ways for customers to enjoy their spa.
- Variable-speed performance gives you a wider range of massage experiences from one pump.

A better spa pump starts at the motor

Maelstrom MS-1 series

CMS-1 - single speed

Big performance. Small design.
Compact, quiet 44 db circulation that moves more water efficiently, even where space is limited.

MS-1 high-efficiency

Performance with less energy
Very low energy use at low speed, without giving up spa performance.

MS-1

Two speeds. More flexibility.
Strong high-speed performance with a lower speed for everyday circulation.

Aqua-Flow pumps

From compact hot tubs to demanding swim spas.

A range of pump options to suit different spa layouts, performance needs and system requirements.

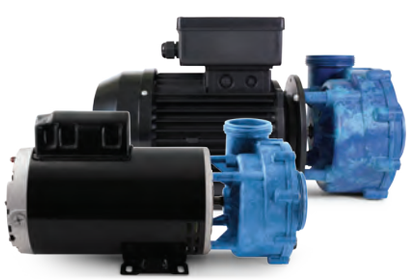

XP3

High flow for bigger demands
Strong, consistent flow for systems with multiple jets.

XP2 / XP2e

For higher-flow spa systems
More flow for spas with multiple features and water demands.

CMXP

Made for continuous circulation
Compact pump for ongoing filtration and heater flow.

Set the mood instantly

in.lu.me & in.mix 300

Match your spa lighting to your mood in a single touch.

Lighting at your fingertips

Control colors and brightness directly from the spa keypad.

Up to 3 lighting zones

Manage each zone independently or synchronize them for one complete look.

Create the right ambiance

Choose from a wide range of colors and adjust the intensity to match the moment.

Quick, clean installation

in.lu.me simplifies the installation of cables and lighting throughout the spa.

Sleek cables and connectors

Cleverly designed loop, spyder and cluster cables and connectors with high-intensity RGB LED lights.

Direct connection

Connects directly to compatible Gecko control systems, with no external LED controller needed.

More ways to build your Gecko spa

in.touch 3 & 3+

Connected control wherever you are

Connect your spa to your smartphone for simple, reliable remote access.

Remote control
Adjust temperature and spa settings from anywhere.

Reliable connection
Proven RF communication helps maintain a strong, stable link between the spa and router.

in.stream 2

Sound made for the spa

A compact, splash-resistant audio system designed to bring music to the spa and backyard.

Great sound, built in
Class D amplifier technology delivers clear, efficient audio performance.

All-in-one design
Audio system and power supply come t-ogether in one compact package.

Built to work together

Control
